SECTION C

INDEX TO VOLUME 24

Authors

Arnason, T. J., Harrington, J. B., and Friesen, H. A.—Inheritance of variegation in barley, 145.

Bannan, M. W.—Tetraploid Taraxacum kok-saghyz. II. Characters of F_1 plants grown in pots, 81.

Bier, J. E. and Nobles, M. K.—Brown pocket rot of Sitka spruce, 115.

Boyes, J. W.—See Ross, J. G.

Bradley, E. C.—See Johnson, L. P. V.

Brodie, H. J. and Jones, J. F.—The effect of changes of air pressure upon the germination of conidia of barley powdery mildew, 318.

Buckland, D. C.—Investigations of decay in western red cedar in British Columbia, 158.

Dansereau, P.—L'érablière laurentienne. II. Les successions et leurs indicateurs, 235.

Friesen, H. A.—
Awn-barbing in barley, 292.
See also Arnason, T. J.

Garrard, E. H.—Coliform contamination of eggs, 121.

Gorham, P. R.—Investigations on rubber-bearing plants. II. Carbohydrates in the roots of Taraxacum kok-saghyz Rod., 47.

Groves, J. W. and Skolko, A. J.—Notes on seed-borne fungi. IV. Acremoniella, Chlamydomyces, and Trichocladium, 74.

Harrington, J. B.—See Arnason, T. J.

Helson, V.—See Krotkov, G.

Heimburger, C.—See Johnson, L. P. V.

Henry, A. W.—See Jackson, A. W.

Holtz, H. W.—See Johnson, L. P. V.

Hunter, G.—See Tuba, J.

Jackson, A. W. and Henry, A. W.—Occurrence of Bacillus polymyxa (Praz.) Mig. in Alberta soils with special reference to its pathogenicity on potato tubers, 39.

James, N., Wilson, J., and Stark, E.—The microflora of stored wheat, 224.

Johnson, L. P. V.—
Fertilization in Ulmus with special reference to hybridization procedure, 1.
Effect of humidity on the longevity of Populus and Ulmus seeds in storage, 298.
A note on inheritance in F_1 and F_2 hybrids of Populus alba L. × P. grandidentata Michx., 313.

Johnson, L. P. V. and Bradley, E. C.—Hybridization technique for forest trees, 305.

Johnson, L. P. V. and Heimburger, C.—Preliminary report on interspecific hybridization in forest trees, 308.

Johnson, L. P. V. and Holtz, H. W.—Colchicine treatment techniques for sprouted seeds and seedlings, 303.

Johnson, T.—
The effect of DDT on the stem rust reaction of Khapli wheat, 23.
See also Newton, M.

Jones, J. F.—See Brodie, H. J.

Katznelson, H.—Studies with Bacillus polymyxa. IV. Nitrogen requirements in relation to 2,3-butanediol production from starch, 99.

Krotkov, G. and Helson, V.—Carbohydrate metabolism of McIntosh apples during their development on tree and in cold storage. Part 1. General trends, 126.

Leggatt, C. W.—Germination of seeds of three species of Agrostis, 7.

Miller, J. J.—
Cultural and taxonomic studies on certain Fusaria
I. Mutation in culture, 188.
II. The taxonomic problem in Fusarium with particular reference to section Elegans, 213.

Moore, R. J.—
Investigations on rubber-bearing plants
III. Development of normal and aborting seeds in Asclepias syriaca L., 55.
IV. Cytogenetic studies in Asclepias (Tourn.) L., 66.

Newton, M. and Johnson, T.—Physiologic races of Puccinia graminis Tritici in Canada, 1919 to 1944, 26.

Nobles, M. K.—See Bier, J. E.

Osborne, J. A.—See Tuba, J.

Ross, J. G. and Boyes, J. W.—Tetraploidy in flax, 4.

Savile, D. B. O.—Entyloma fuscum and related smuts attacking Papaveraceae, 109.

Skolko, A. J.—See Groves, J. W.

Stark, E.—See James, N.

Tuba, J., Hunter, G., and Osborne, J. A.—On staining for vitamin C in tissues, 182.

Wilson, J.—See James, N.

SECTION C

INDEX TO VOLUME 24

Subjects

Acer saccharophorum, See Maple grove.

Acremoniella, See Fungi (Seed-borne).

Agrostis, Germination of seeds of three species of, 7.

Air pressure, See Fungi (Powdery mildew).

Apples, McIntosh, General trends in carbohydrate metabolism of, during development on tree and in cold storage, 126.

Asclepias
Cytogenetic studies, in, 66.
Development of normal and aborting seeds in Asclepias syriaca, 55.

Ascorbic acid, See Vitamin C.

Awn-barbing in barley, 292.

Bacillus polymyxa, See under Fungi (Bacteria).

Bacteria, See under Fungi.

Barley
Awn-barbing in, 292.
Inheritance of variegation in, 145.
Powdery mildew of, See under Fungi.

Brown pocket rot, See under Fungi.

2,3-Butanediol, Production of, from starch, as related to nitrogen requirements of Bacillus polymyxa, 99.

Carbohydrate(s)
in the roots of Taraxacum kok-saghyz, 47.
metabolism, See Apples.

Cedar, Western red, See under Fungi (Decay).

Chlamydomyces, See Fungi (Seed-borne).

Colchicine treatment techniques for sprouted seeds and seedlings, 303.

Cold storage, See Apples.

Coliform contamination of eggs, 121.

Conidia, See Fungi (Powdery mildew).

Cytogenetics
Cytogenetic studies in Asclepias, 66.
Tetraploid characters of F_1 plants of Taraxacum kok-saghyz grown in pots, 81.
Tetraploidy in flax, 4.

Dandelion, Russian, See Taraxacum kok-saghyz.

DDT, Effect of, on the stem rust reaction of Khapli wheat, 23.

Decay, See under Fungi.

Eggs, Coliform contamination of, 121.

Entyloma fuscum, See under Fungi.

Fertilization in Ulmus with special reference to hybridization procedure, 1.

Flax, Tetraploidy in, 4.

Food(s), See Carbohydrates.

Forest trees, See under Trees.

Fungi
Bacteria
Bacillus polymyxa
in Alberta soils with special reference to its pathogenicity on potato tubers, 39.
Nitrogen requirements of, in relation to 2,3-butanediol production from starch, 99.
Coliform contamination of eggs, 121.
Brown pocket rot of Sitka spruce, 115.
Decay in western red cedar in British Columbia, 158.
Entyloma fuscum and related smuts attacking Papaveraceae, 109.
Fusaria, Cultural and taxonomic studies on,
Mutation in culture, 188.
Taxonomic problem in Fusarium with particular reference to section Elegans, 213.
Microflora of stored wheat, 224.
Powdery mildew of barley, Effect of changes of air pressure upon the germination of conidia of, 318.

Fungi—*Concluded*
Puccinia graminis Tritici
Effect of DDT on reaction of Khapli wheat to, 23.
Physiologic races of, in Canada, 1919 to 1944, 26.
Seed-borne, Notes on Acremoniella, Chlamdomyces, and Trichocladium, 74.

Fusaria, See under Fungi.

Germination
of conidia, See Fungi (Powdery mildew).
of seeds, See Agrostis.

Humidity, Effect of, on longevity of Populus and Ulmus seeds in storage, 298.

Hybridization, See Trees (Forest trees, Populus, and Ulmus).

Inheritance
in F_1 and F_2 hybrids of Populus alba × P. grandidentata, 313.
of variegation in barley, 145.

McIntosh apples, See Apples.

Maple grove, Plant successions and their indicators in, in the St. Lawrence valley, 235.

Microflora, See under Fungi.

Mildew, Powdery, See under Fungi.

Milkweed, See Asclepias.

Mutation, See Fungi (Fusaria).

Nitrogen, See Bacillus polymyxa (under Fungi).

Papaveraceae, See Fungi (Entyloma fuscum).

Plant successions and their indicators in the maple grove in the St. Lawrence valley, 235.

Pocket rot, Brown, See under Fungi.

Populus, See under Trees.

Potatoes, See Bacillus polymyxa (under Fungi).

Puccinia graminis Tritici, See under Fungi.

Red cedar, Western, See Fungi (Decay).

Roots of Taraxacum kok-saghyz, Carbohydrates in, 47.

Rot, Brown pocket, See under Fungi.

Rubber-bearing plants
Carbohydrates in the roots of Taraxacum kok-saghyz, 47.
Characters of F_1 tetraploid Taraxacum kok-saghyz grown in pots, 81.
Cytogenetic studies in Asclepias, 66.
Development of normal and aborting seeds in Asclepias syriaca, 55.

Rust, Stem, See Fungi (Puccinia graminis Tritici).

Seed-borne fungi, See Fungi (Seed-borne).

Seedlings, Colchicine treatment techniques for, 303.

Seeds
of Agrostis, Germination of, 7.
of Asclepias syriaca, Normal and aborting, Development of, 55.
of Populus and Ulmus in storage, Effect of humidity on the longevity of, 298.
Sprouted, Colchicine treatment techniques for, 303.

Sitka spruce, Brown pocket rot of, 115.

Smuts, See Fungi (Entyloma fuscum).

Soils, See Bacillus polymyxa (under Fungi).

Spruce, Sitka, Brown pocket rot of, 115.

Staining for vitamin C in tissues, 182.

Starch, See 2,3-Butanediol.

Stem rust, See Fungi (Puccinia graminis Tritici).

Storage, See Apples, Trees (Populus and Ulmus), and Wheat.

Taraxacum kok-saghyz
Carbohydrates in the roots of, 47.
Tetraploid, Characters of F_1 plants grown in pots, 81.

Tetraploidy, See Flax and Taraxacum kok-saghyz.

Thuja plicata, See Fungi (Decay).

Tissues, Staining for vitamin C in, 182.

Trees
Apple, General trends in carbohydrate metabolism of McIntosh apples during development on, 126.

Trees—*Concluded*

Forest trees

Hybridization technique for, 305.

Interspecific hybridization in, 308.

Populus

Inheritance in F_1 and F_2 hybrids of Populus alba × P. grandidentata, 313.

Longevity of seeds of, in storage, as affected by humidity, 298.

Ulmus

Fertilization in, with special reference to hybridization procedure, 1.

Longevity of seeds of, in storage, as affected by humidity, 298.

Trichocladium, See Fungi (Seed-borne).

Triticum dicoccum, See Wheat.

Ulmus, See under Trees.

Variegation, See Barley.

Vitamin C, Staining for, in tissues, 182.

Western red cedar, See Fungi (Decay).

Wheat

Khapli, Effect of DDT on stem rust reaction of, 23.

Stored, Microflora of, 224.
